With 10-inch LCD monitor
You can deliver your facility ad
with the built-in SD card!

Gaura Pro

Continuous supply, instantly

Enjoy strong antioxidant water of H₂ concentrations 0.8 – 1.2ppm on demand!

WHY H2WATER ?

When consumed, these H₂ nano-molecules have the capability to act on a cellular level, effectively removing selective free radicals from your body.

The benefits of H₂WATER has been studied since 2007, with over 500-reviewed studies. Our H₂WATER is believed to produce these benefits:

- Antioxidant
- Anti-Fatigue
- Anti-Bacteria
- Anti-Ageing
- Anti-Inflammatory
- Improve Energy & Reduce Ache
- Improve Oral hygiene
- Improve Wellness

If you treasure your health, get your hydrogen bottle today!

Hydrogen (H₂) water is a strong natural antioxidant and health supplement.

H₂WATER can be consumed by everyone, including the elderly, pregnant women and infants. Drink within 10 minutes of production, as hydrogen molecules will disappear in an hour.

Electrolysis uses electricity to separate hydrogen molecules from water. H₂ then re-binds with water to form H₂WATER.

GAURA WALK PORTABLE H₂WATER GENERATOR

Japan's electrolysis technology

Made in Japan,

the GAURA WALK is **lightweight and portable**; it is easy to carry around, and convenient to drink fresh, hydrogen enriched water anytime, anywhere.

- Capacity: 300ml
- Material: Polycarbonate
- Operating temperature setting: 0 - 70 °C
- Bottle charging time: approx. 5 hours
- No. of times bottle can be recharged: approx. 500 times
- Accessories: AC adaptor (110 - 230V), micro USB cable
- Water to be used: tap water, bottled water, boiled water, filtered water, mineral water, distilled water, pure water

GAURA WALK is also **rechargeable**; plug in a USB cable fitted with an AC adaptor, and switch on the power supply. A flashing blue light indicates charging in progress, while a constant blue light indicates that charging has been completed.

Operation	3 MIN	6 MIN
No. of times useable when fully charged	10 - 14 times	5 - 7 times
Total no. of useable times	7000 times	3500 times
H ₂ concentration	0.8 - 1.0 ppm	1.0 - 1.2 ppm

Typical test results	pH	ORP (mV)
Tap water @ 27.3°C	6.43	+253
3 MIN charge	6.98	-283
6 MIN charge	7.13	-323

Being **easy to clean and maintain**, GAURA WALK will never be a hassle. Rinse inside the bottle daily with tap water. Bi-monthly, include 1 teaspoon of citric acid powder with 150ml (1/2 bottle) of water. Shake well and let it stay for 8 hours or overnight. Rinse and it will be ready to make hydrogen water.

Negative ORP (Oxidation reduction potential) value is an indicator of antioxidant. The more negative the ORP is, the more antioxidants there are.
